MOODY AND SANKEY.

AMERICAN ORGANS in every variety of
CRAMER'S Manufacture and on CRAMER'S
Three Years System.

Prices from 15 Guineas, or £1 11s. 6d. a Quarter.

CRAMER and Co. by no means wish it to be understood, as in some quarters it would seem to have been, that their
AMERICAN ORGANS are used by Messrs. Moody and Sankey at their interesting meetings.

CRAMER'S instruments are much more solid in manufacture, and infinitely superior in quality of tone, and are cer-
tainly not open to the objection made by perhaps the most influential literary and musical journal to the imported organs:—
"Judged from the artistic point of view, the instrument is no more agreeable to the ear than is the stentorian power
displayed by the singer."

Moreover, while CRAMER'S AMERICAN ORGANS are more satisfactorily made, and better finished in all respects, they
are sold at prices varying from 15 to 25 per cent. below those of all imported instruments.

These, and all other instruments of CRAMER'S manufacture, can be had on the three years system, which, originated
by CRAMER'S, has been partially adopted by other firms, but is carried out on a thoroughly large and liberal scale only by
themselves.

NEW WORK BY THE AUTHOR OF "THE GREAT LONE LAND."

AKIM-FOO: the History of a Failure. By Major W. F. BUTLER, C.B., Author of "The Great Lone Land," "The Wild North Land," &c. 1 vol. demy 8vo, with a new Map of his Route across the Akim Country to Coomassie and Frontispiece, price 14s. [Now ready.]

"The failure of which Major Butler has so frankly, so touchingly told the history, reflected more credit on him than has many a success on more fortunate persons. He failed not from want of capacity, but simply on account of the worthlessness of the tools placed in his hands. We strongly recommend our readers to peruse the work before us. To our mind 'Akim-foo' is the best of the literary results of our last little war."—*Athenæum*.

By the Rev. WILLIAM JACKSON, M.A., F.S.A., formerly Fellow of Worcester College, Author of "Positivism," &c.
"The present writer would stake here his critical reputation, whatever that may be worth, on the assertion that few in our day have done better service than Mr. Jackson, by furnishing as he does so many independent, but in the end consistent lines of argument which inevitably lead up to the conclusion that the laws of nature and the conscience of man, who is yet a part of nature, must have had a rational and moral origin. Thanking him for his singularly able, comprehensive, and suggestive essay," &c.—*Spectator*.

"The whole character of the work appears to have been altered, and an effort has evidently been made to make it a mineralogical dictionary, a very large number of names and descriptions of minerals having been incorporated, many of which are largely used in connexion with industrial processes, while others are of scientific interest for their rarity or peculiar properties. The type for the work has been reset throughout, and nearly 200 new woodcuts added, making 2,100 in all. It may therefore be safely said that the seventh edition of URE's Dictionary has its well-earned reputation for utility and completeness, but to assume the still higher position of a text-book of technological processes which practical men may consult with confidence."
